

MANAGEMENT AGENCY AGREEMENT  
BETWEEN THE CENTRAL VALLEY REGIONAL WATER QUALITY CONTROL  
BOARD AND THE UNITED STATES BUREAU OF RECLAMATION

This Management Agency Agreement (hereinafter "Agreement") is entered into by and between the Central Valley Regional Water Quality Control Board (hereinafter "Regional Water Board"), acting through the Executive Officer, and the United States Bureau of Reclamation<sup>1</sup> (hereinafter "Reclamation"), acting through the Regional Director of the Mid Pacific Region, for the purpose of addressing certain salt imports to the Lower San Joaquin River (LSJR). The Agreement is a voluntary and cooperative means of implementing relevant provisions of the Regional Water Board's *Water Quality Control Plan for the Sacramento River and the San Joaquin River Basins – 4<sup>th</sup> Edition* (Basin Plan).

WHEREAS:

1. The Basin Plan sets load allocations for the Delta-Mendota Canal (DMC) and sets forth that the Regional Water Board can enter into a Management Agency Agreement (MAA) with Reclamation as part of its implementation plan.
2. Under the Basin Plan, the MAA is to require Reclamation to address salt imports from the DMC to the Lower San Joaquin watershed. The current timetable under the Basin Plan allows 8 -12 years for the DMC to achieve compliance with DMC load allocations, however the Basin Plan and its timetable are subject to revision.
3. The Regional Water Board and Reclamation have agreed to proceed on a cooperative basis to circumvent any dispute as to whether the Regional Water Board can legally enforce DMC load allocations against Reclamation under the current Basin Plan.
4. Proceeding in a cooperative basis is an efficient and effective means of achieving water quality goals.
5. Salt and boron imported into the LSJR watershed via the DMC should be managed in a manner that is protective of both surface water and groundwater;
6. Salt and boron objectives prescribed in the Basin Plan for the San Joaquin River at the Airport Way Bridge near Vernalis should be achieved

---

<sup>1</sup> By entering into this agreement, Reclamation does not waive and specifically reserves any argument regarding whether the State of California, including the State Water Resources Control Board and the Regional Water Quality Board, can regulate and enforce state nonpoint source standards, objectives, or load allocations against Reclamation owned facilities in the manner contemplated in the current Basin Plan.

through the actions of Reclamation under this agreement and through the actions of other responsible parties;

7. Reclamation and the Regional Water Board should work together with other responsible parties to achieve compliance with the San Joaquin River salt and boron objectives while facilitating the export of the maximum amount of salt out of the San Joaquin basin;

8. The Regional Water Board is responsible for protecting water quality and beneficial uses of waters within the Central Valley Region;

9. Reclamation holds water rights that facilitate the operation of the Central Valley Project (CVP), including the DMC;

10. Reclamation has prepared a document entitled *Actions to Address the Salinity and Boron TMDL Issues for the Lower San Joaquin River* (hereinafter "Action Plan"), which describes Reclamation's past, current and planned practices and procedures to mitigate and manage adverse impacts of salt and boron imported into the San Joaquin basin via the DMC in order to help achieve compliance with the objectives contained in the Basin Plan;

11. Reclamation's Action Plan includes Reclamation's agreement to lead the effort to develop stakeholder interest in a real-time water quality management program (hereinafter "Real Time Program"). The Real Time Program would involve, among other things, Reclamation monitoring and modeling efforts to determine assimilative capacity of the Lower San Joaquin on a real-time basis. Stakeholders along the San Joaquin that are subject to salt and boron load allocations in the Basin Plan must participate in the Real Time Program to qualify for conditional waivers of waste discharge requirements.

NOW, THEREFORE, the parties hereto agree as follows:

1. Reclamation agrees:

- a. To implement its Action Plan in accordance with the schedule contained in the Action Plan;
- b. To submit reports to the Regional Water Board in accordance with the provisions of 3. c, below.

2. The Regional Water Board agrees:

- a. That Reclamation's successful and timely implementation of its Action Plan and this Agreement is a cooperative means of achieving DMC load allocations as set forth in the Basin Plan;

- b. That the Real Time Program described in Reclamation's Action Plan will be a jointly developed program between Reclamation and stakeholders where stakeholders could join common efforts to meet salt and boron objectives without restricting the ability to export salt out of the San Joaquin basin.
  - c. To continue to evaluate Reclamation's progress toward the implementation of its Action Plan and this Agreement, the goals of which are to establish a comprehensive Real Time Program that would meet the approval of the Regional Water Board;
  - d. That Regional Water Board staff will make regular presentations to the Regional Water Board at publicly-noticed meetings, which will describe Reclamation's activities and will assess Reclamation's progress toward establishing an acceptable Real Time Program. Reclamation shall receive personal notice of these meetings.
3. It is mutually agreed:
- a. That an initial two-year monitoring, reporting, and assessment program will be jointly implemented by Reclamation and the Regional Water Board. The purpose of this program will be to:
    - i. Establish the information, data, and methodologies needed to evaluate the salt loads from DMC operations and salinity offset credits to be applied to the various elements of Reclamation's Action Plan.
    - ii. Quantify the salt mitigation benefit of those activities and projects in Reclamation's Action Plan that are currently being implemented or that have been implemented in the past; and
    - iii. Assess the progress made toward establishing a viable Real Time Program.
  - b. This agreement is expressly subject to modification following the initial 2-year assessment period.
  - c. That the initial monitoring, reporting, and assessment program will consist of the following:
    - i **Quarterly Activity and Monitoring Reports**

Reclamation will submit **quarterly reports** to the Regional Water Board by 45 days after the end of the calendar quarter. The quarterly reports will include a summary of activities conducted by Reclamation during the quarter in conjunction with each element included in their Action Plan, including activities related to

developing a Real Time Program. In addition Reclamation will include data collected relevant to DMC load evaluation.

ii. **January 1, 2009 – Submittal of Reclamation's Draft Compliance Monitoring and Evaluation Plan**

Reclamation will submit a **Draft Compliance Monitoring and Evaluation Plan** to the Regional Water Board. Where appropriate, the draft plan will propose the data and quantification methods used to evaluate the salt loads from DMC operations and salinity offset credits to be applied to the various elements of Reclamation's Action Plan.

Data will include monitoring locations, parameters monitored, data collection methods, and data quality control. Included with the proposed quantification methods for salt load offset credits for each element of Reclamation's Action Plan will be a description of the salt mitigation benefit of each element and a clear explanation of how the proposed quantification method accurately quantifies the salt load effect.

iii. **July 1, 2009 – Deadline for Regional Water Board approval of Reclamation's Compliance Monitoring and Evaluation Plan**

Regional Water Board staff will review and evaluate Reclamation's **Draft Compliance Monitoring and Evaluation Plan**, provide comments and negotiate revisions needed to ensure the data is adequate to evaluate the salt loads from DMC operations and salinity offset credits to be applied to the various elements of Reclamation's Action Plan. Approval of the plan can be granted by the Regional Water Board's Executive Officer.

iv. **January 1, 2010 – Submittal of Reclamation's Draft Compliance Monitoring and Evaluation Report**

Reclamation will submit a **Draft Compliance Monitoring and Evaluation Report** to the Regional Water Board. Where appropriate, the draft report will include the data and quantification methods used to evaluate the salt loads from DMC operations and salinity offset credits to be applied to the various elements of Reclamation's Action Plan. The Regional Water Board acknowledges that Reclamation has been implementing measures in the Action Plan for years prior to adoption of the current TMDL. At Reclamation's option, the draft report may quantify the results of past actions to assist with future evaluation of the DMC load allocation.

Additionally, the draft report will summarize the activities conducted and resources provided by Reclamation in implementing the Real

Time Program of its Action Plan, the progress and status of efforts to establish a viable Real Time Program, and a schedule and milestones for planned activities.

**v. July 1, 2010 – Submittal of Reclamation’s Final Compliance Monitoring and Evaluation Report**

Reclamation will submit a **Final Compliance Monitoring and Evaluation Report** to the Regional Water Board. Where appropriate, the report will include the data and quantification methods used to evaluate the salt loads from DMC operations and salinity offset credits to be applied to the various elements of Reclamation’s Action Plan. The Regional Water Board acknowledges that Reclamation has been implementing measures in the Action Plan for years prior to adoption of the current TMDL. At Reclamation’s option, the report may quantify the results of past actions to assist with future evaluation of the DMC load allocation.

Additionally, the report will summarize the activities conducted and resources provided by Reclamation in implementing the Real Time Program element of its Action Plan, the progress and status of efforts to establish a viable Real Time Program, and a schedule and milestones for planned activities.

- d. That revisions to this Agreement must be approved by Reclamation and the Regional Water Board’s Executive Officer in writing;
- e. That any revisions to Reclamation’s Plan must be approved by the Regional Water Board or its Executive Officer. Such revisions will be effective at a date to be determined upon submittal of an acceptance letter from each party to the other party. The acceptance letters will include summaries of the mutually acceptable revisions and the date the revisions will go into effect;
- f. To meet no less than quarterly to maintain coordination and communication, report on Reclamation’s progress toward establishing an acceptable Real Time Program, review proceedings under this agreement, and consider revisions to this Agreement and/or Reclamation’s Plan as requested by either party;
- g. That this agreement shall become effective as soon as it is signed by the parties hereto and shall continue in force unless terminated by either party upon ninety (90) days notice in writing to the other of intention to terminate upon a date indicated.
- h. That, if either party terminates this agreement, the Regional Water Board will pursue traditional regulatory means of implementing the provisions of the Basin Plan, including those against Reclamation, to the extent that they apply.

- i. That this agreement may be suspended in an emergency.  
“Emergency” means an extraordinary occurrence or combination of circumstances that was unforeseen and unexpected at the time that this Agreement was entered into, and that substantially affects the ability of either of the parties to fulfill their obligations under this agreement.
- j. That nothing herein shall be construed in any way as limiting the authority of the Regional Water Board in carrying out their legal responsibilities for management or regulation of water quality;
- k. That nothing herein shall be construed as limiting or affecting in any way the legal authority of Reclamation in connection with the proper administration and management of Bureau of Reclamation facilities and water management and delivery systems;
- l. That funding under this agreement is subject to the requirements of the Anti-Deficiency Act, 31 USC §§ 1341 et seq., and other applicable law. Nothing in this agreement is intended or shall be construed to require the obligation, appropriation, or expenditure of any funds from the United States Treasury, except as otherwise permitted by applicable law. Nothing in this agreement may be construed to obligate the United States Department of the Interior or the United States to any current or future expenditure of resources in advance of the availability of appropriations from Congress. Nor does this agreement obligate the Department of the Interior or the United States to spend funds on any particular project or purpose, even if funds are available.
- m. That nothing herein shall be construed in any way as subjecting Reclamation to any requirement, process, or sanction for which Congress has not waived sovereign immunity under section 313 of the federal Clean Water Act, 33 USC § 1323.

IN WITNESS WHEREOF, the parties hereto, by their respective duly authorized officers, have executed this Agreement in duplicate on the respective dates indicated below.
